

## About Me

CS student continuous learner proficient in JS NodeJS Java Go and ReactJS MongoDB MySQL PHP Laravel Tailwind and Bootstrap building/using CLI. Seeking an opportunity to leverage skills and contribute to a dynamic org

## Education

### Lebanese International University

2020 - Present

B.Sc-Computer Science

### Coursera

2023 - Present

IBM DevOps and SE

Professional Certificate

## Skills

### Javascript

### Java

### JavaScript Frameworks

### JavaScript Libraries

### React.js

### Bootstrap

### MySQL

### MongoDB

### PHP

### Laravel

### Go

### CLI

### Arduino UNO

### Node.js

### Linux

### Windows

### Vim

### Visual Studio Code

## Projects

### RequestCLI

CLI app alternative to httpie and curl is designed to be beginnerfriendly easy to made various HTTP requests. It offers advanced features such as handling cookies basic auth format and colorize outputs. I gained valuable experience in backend dev through this project.

### Portfolio

I built my React portfolio with modern web technologies React TailwindCSS and Vite. It showcases my frontend skills including responsive UIs component reuse state management and routing.

### Blogs-app

I created a PHPbased blog app using PHP HTML and CSS. Users can create accounts read articles and publish new content. This was one of my first projects solidifying my knowledge of backend development concepts.

## Achievements

Built multiple full-stack applications with modern technologies, utilizing Git and GitHub for version control and collaborating with team members. Familiar with Agile and Scrum methodologies, with a DevOps specialization from Coursera.
